EDUCATION

K.J. Somaiya College of Engineering SEM V B.Tech in Computer Engineering – CGPA: 7.3/10	Mumbai, MH (2023–2027)
RN Podar Senior Secondary School Class XII (CBSE)	Mumbai, MH (2023)
Utpal Sanghvi Global School Class X (IGCSE)	Mumbai, MH (2021)

Relevant Coursework: C++, Data Structures, Web Development, DBMS, Java, Python, SQL

TECHNICAL SKILLS

- **Languages:** C++, Java, Python, SQL, HTML, CSS, JavaScript
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, Web Development, Databases
AI/ML Fundamentals

CERTIFICATIONS

- **Digital Trends: AI, Metaverse, Persuasive Tech & Blockchain — UC Davis (Coursera)**
Completed – Gained a practical understanding of emerging digital technologies including AI, blockchain, and the metaverse, with a focus on how persuasive tech shapes user behavior and innovation.
- **Economics of Money and Banking — Columbia University (Coursera)**
Completed – Studied modern monetary systems, banking mechanisms, and financial markets, developing a clear understanding of liquidity, credit creation, and the role of central banks.
- **Exploring Generative AI for Learning Design — University of Michigan (Coursera)**
Completed – Learned to apply generative AI tools for instructional design, optimizing content creation, assessments, and personalized learning workflows.
- **UX Design Fundamentals — California Institute of the Arts (Coursera)**
Completed – Built foundational UX skills in user research, wireframing, prototyping, and usability principles to design intuitive, user-centered digital experiences.
- **UX Design Fundamentals — California Institute of the Arts (Coursera)**
Completed – Explored AI-powered creative workflows, learning to leverage models for ideation, content generation, and enhancing creative problem-solving.

EXPERIENCE

Research Intern – Drnk (Blazeblends Food Pvt Ltd)

On site | 2023

- Contributed to planning and executing marketing campaigns and outreach programs.
- Conducted competitive research to support strategic decisions.
- Assisted in business development and provided data-driven insights for growth.

Research Intern – SunXora

On site | June 2025

- Conducted market research across Cybersecurity, ESG, and CRM sectors, analyzing industry trends, market size, and competitive landscapes.
- Created detailed research reports and strategic insights to support business development and product positioning.

PROJECTS

Book My Show Clone Website

Group Project | K.J. Somaiya College of Engineering | 2025

- Built a full-stack clone of BookMyShow with features like movie listings, seat selection, and dummy payments.
- Collaborated in a 3-member team; personally handled database design and backend integration.

MediStore – Cloud-Based Healthcare Management System

FullStack MERN Application | Group Project | K.J. Somaiya College of Engineering | 2025

- Built a secure, cloud-based web app for storing and managing patient health records.
- Designed dashboards and digital prescription features using React.js and Express.js.
- Integrated MockAPI for authentication and role-based routing (Patient, Doctor, Admin)
